
Tango Coin Production - Half Dollar D0186 by Tango

From the creative mind of Marcelo Insúa a.k.a. Mister Tango, you now have a great finale for your coin magic routine. Imagine making 10 coins appear in a very easy way!

This is a magnetic stack of coins for production. There is a magnet insert in every coin, and this keeps the ten coins together. However, when you produce the coins, it doesn't attract the other coins! The magnet allows you to take the coins from your sleeve, from your lap or from any kind of load, so you can now palm ten coins as only one.

Available in quarter dollar, half dollar and one dollar. Video instructions.
