
MEDIUM by Hugo Valenzuela

"Everything that is invisible to the eye is often difficult to believe. For this reason, many people still question the existence of the spirits and energies..."

Say the above during your performance, or perhaps the following: "Spirits do not show themselves where there is much light." You could illuminate the scene with candles, or even the light emitted by cell phone screens, creating even more mystery.

With such a creative presentation, **MEDIUM** can cause chills in your audience.

Effect: A small object is placed on your hand. With your and your spectators' concentration, the object slowly and visibly moves onto its side - and sometimes even flips over! Especially powerful when placed under a glass during this eerie demonstration! **MEDIUM** allows you to achieve this. Is the spirit making its presence known via the object?

- The video speaks for itself - you'll see how powerful this looks!

You use **MEDIUM** with small objects, demonstrating interactions with spirits or your audience's amazing energy to reach "the beyond."

Small objects such as:

- * Coins
- * Pieces of cards with words written on them
- * Reliquaries - the object may be covered with a glass during this impossible-looking effect!
- * Predictions on paper

Objects can be borrowed and signed.

MEDIUM includes gimmick and online explanatory video.

The video will show you how to prepare the gimmick, and different methods of execution for each situation.

MEDIUM is not just a magic effect. The effect it causes can cast doubt on people's former beliefs, so you should seek to use it responsibly.
