
Detection Bag by Leo Smetsers

Leo Smetsers has created a beautiful, close-up version of a classic Maurice Fogel effect.

Totally ideal for any close-up situation. In addition, this will play equally as amazing on stage!

Imagine, while your back is turned, four spectators each pick a different flavored sweet, and pop it into a bag. The bags are mixed and handed to you one at a time. Upon removing the sweet from the bag, you can instantly give it to the spectator who selected it. Not only is this effect totally amazing to your spectators, it's also fun to perform and leaves them with a sweet souvenir!

In your pack, you will get 4 leather effect bags that are small enough to fit in your inside pocket, and a streaming video packed with routine ideas!

Mentalism and candy - what could be sweeter?
