
Knife Through Coat by Amazo Magic

The Knife Through Coat has stood the test of time as a classic in magic - it always amazes your audience (and excites your volunteer)! Our **Knife Through Coat by Amazo Magic** is a new model knife -- it creates the brilliant illusion of piercing the jacket of a spectator sitting in the front row.

It consists of a natural-wood handle, a stainless steel blade, and a powerful "secret something." The knife is very easy to handle and, aesthetically, it looks great!

It can also be used in close-up effects, such as popping a balloon or in the Card Stab effect. It is approximately 20 centimeters long.

Enjoy your audience's reaction to this updated miracle of magic!
