
Razor Switch Device (RSD) by Amazo Magic

After showing five sharp blades, the performer puts them in a plastic case. He removes the blades from the case, and places them in his mouth. A bit of thread is then put into his mouth. The thread is then slowly pulled out, and the blades are now shown to be attached to the thread! This is a high precision product - offering a new and better method for switching blades. This is a completely revised design, and is completely removable. You will be able to present this classic effect of blades coming out of your mouth, strung on a thread.

Features:

- Easy to use.
- High quality support, utilizing durable plastic material.
- Can be assembled in seconds.
- You can perform it even using your assistant's hands, or on the table.
- The base measures 13 x 28 centimeters.

Video instructions included.

NOTE: Blades and Thread are not included.
