
Classic Blooming Bouquet Double (5) by Mr. Magic

The magician displays a Bouquet of 5 white flowers. As he plucks them one by one, he is left with a bunch of stems and leaves. Suddenly the bunch begins to swell, and small, multi-colored buds inexplicitly appear on the stems. The buds continue to grow, bigger and bigger, until the magician is holding a beautiful, full multi-colored bouquet of flowers.

This is a visual and colorful effect that is self-working due to the mechanical components. This can also be done in a pot by the magician, or by an assistant without it seemingly being touched.

- Bouquet comes complete with 5 loose white flowers.
- Stalk is made of brass to avoid rust, and is covered with green feathers.
- All flowers (fixed and loose) are made of cloth for long durability.
- Great value and much easier to operate than other Birth of Flower versions.
