
Sucker Coin Box by Mr. Magic

The classic Die Box comedy routine has now been redesigned to be performed close-up with a coin. Your audience sees a coin slide back and forth between two separated compartments.

Each time you open one of the compartments to show the coin has "vanished," the audience actually sees the coin sliding into the other side. Just when they think they know how you are performing this "magic" feat, you open BOTH compartments to show the coin has actually vanished completely! Very easy to learn and perform!
