## Saturn Magic Presents Cube Cards by Kev G

*"A wonderful routine that's easy to do and excellent for table hopping"*

- Takamiz Usui

*"A logical and brilliant routine using only one cube that's perfect for close-up"*

- Kieron Johnson

*"If you want to make your audiences eyes pop out of their heads, you **NEED** this trick!"*

- Mark Elsdon

Whether you're a beginner or an expert in Rubik's Cube Magic, **Cube Cards** is the ideal routine to add to your repertoire.

It's perfect for close-up or parlor as it connects with your audience, comes full circle and contains **four eye popping moments of magic** including matches, changes and solves!

You explain how many possible combinations the cube has as well as the World Championship competition and events held each year. Your spectators freely choose a Rubik's Cube World Championship "challenge" card from a selection, which display different cube patterns.

The card is shown to you for ten seconds and you amazingly proceed to mix the cube matching it to the pattern selected.

Not only that, but you take their chosen challenge card and it visually changes to a solved image of a cube. You then turn over the other cards and they are also now showing solved cube images.

The cube is now the odd item not being solved so you shake it from side-to-side and it visually is solved - now everything matches and you take your applause!

- Easy to learn routine
- **No memory work required**
- No real cube solving skills required - You do not need to know how to solve a Rubik's Cube

- 
- **Examinable before and after**
  - Quick reset and instant reset options
  - **Only one ungimmicked speed cube required (not included - different cube types are discussed)**
  - Bonus #1 - Additional "creative" cards and ideas included
  - **Bonus #2 - Kev G's cube holder design explained**
  - Custom "World Championship Challenge Cards" included and online tutorial

Please note if you are mixing different decks of **Cube Cards** together (3 variations available) there may be a color difference due to them being printed at different times. This will not affect the trick at all as it has no bearing on the trick.
