
TURN by Peter Pellikaan

TURN is just one of those tricks you have to see. So, stop what you're doing and watch the quick trailer--it's less than a minute long.

In short, this trick with four cards is an **ADVENTURE**. Cards change from blue to red to green to multicolored, and the faces change from blank to Queens to Jokers. But it's the smooth-as-silk handling that sets this packet trick apart. Dare we say, it might be the most efficient, amazing packet trick we've ever seen. It is certainly our **VERY** favorite Peter Pellikaan creation to date. Usually in tricks of this kind, there are necessary adjustments. You have to change the count you do, or move a card from top to bottom, or do a secret reversal, or take a card out, or add one in. **GONE!** In **TURN**, the handling looks identical in each phase, and one phase flows seamlessly into the next.

You receive a set of specially gimmicked cards and an easy-to-follow video tutorial.
