
Moroccan Wrist Restraint by Magic World

Imagine... A chosen playing card is lost in the deck. You then proceed to have your wrists tightly locked together using the **Moroccan Wrist Restraint**. Following that, you then ask the spectators to begin counting down from 5. You don't just escape within that time, but you find their chosen card, which is revealed in your mouth after turning 360 degrees!

GREAT REACTIONS GUARANTEED!

And there's more!... The possibilities with this device are endless, along with more traditional effects where your tied-and-bound wrists pass impossibly through objects like microphone wires, chair arms and solid rings.

This simple, but extremely effective, apparatus consists of a thick leather strap and buckle. The strap, which can be thoroughly examined, can be placed around the spectator's wrist to prove that this is sturdy, and secure. The spectator finds it impossible to escape!

The spectator can now place the strap around your wrist - **and instantly you are FREE!**

Many amusing effects are possible. Two spectators assist you by holding a small sack/bag or pillow-case between them. After your wrists have been secured, you place your hands into the bag/sack. Instantly you take out one of your hands and push the spectator, asking him to stand a little further back. This is then repeated with the other hand and the other spectator. Yet, when you place your hands back into the bag/sack, you instantly lift them out to show that they are still strapped together securely as before!

An excellent restraint to use in conjunction with other Escape Apparatus such as the spirit Sack, Mail Bag, Sub Trunk, Packing Case Escapes etc. The use of this effective escape is limited only by your imagination!
