
Void (red) by Agus Tjiu

From the mind of Agus Tjiu. Creator of Cross and Nametag.

A new and improved visual hole transformation effect. VOID.

The spectator chooses a card, then the magician marks the chosen card with a hole puncher.

Without any fancy moves, the magician transports the hole to another location on the same card.

It happens inches away from the spectator without cover or other funny business.

Comes with a special routine suggestion to transport the hole to another free chosen signed card, and can be given to the spectator as a souvenir and leaves them completely astonished.

New innovation hole transportation system:

No flaps, no sticky stuff

Made with precision

Comes with 2 types of gimmick to support your routine:

1 "double back" type

1 "regular look" type
