
Square Circle Folded (Plastic) by Mr. Magic

Square Circle is an old classic trick which always amazes an audience. **Square Circle Folded** is the latest version of the same trick but the product folds completely flat and has almost no weight making it easy to transport from one place to another.

Effect:

The magician presents a larger rectangular tube on a thin base on a table, the outer tube has a Spade shape cut out of it and the inner tube is smaller and taller than the outer tube and is a contrasting color with the outer tube. The magician can show the tubes one by one to make sure they have no place to hide anything in it. They are nested back together and an enormous load of colorful and solid materials are produced from the inside.

What's included:

- The base
- The outer tube
- The inner tube
- The gimmick
