The book test is a classic in mentalism and mental magic. Every professional show demonstrating the power of mind reading should include a solid book test as a staple.

Usually book tests that go **beyond** a simple *"think of a word"* routine involve expensive, specially printed books that will tarnish and tear over time. When you purchase the **PYO Book Test**, you get everything you need to print your own copies of this book test for extremely minimal cost and the added bonus of performing an astounding book test with your smartphone too.

So what's the effect? With PYO, you take a book, or a number of different books, and have a spectator turn to any page. They will read silently the first paragraph. As they read, you will begin to pick up impressions; you'll tell them specific things the character is experiencing, whether it's a male or female voice that you're picking up on, and more. Finally, the spectator is to focus on just a single word. You then read their mind and tell them the word they are merely thinking about.

Features:

- Single or multiple spectators can be used.
- Examinable books.
- Works 100%, every time. No chance of failure.
- Instant reset & repeatable with different results.
- It feels like you can see through your spectator's eyes and can describe exactly what they're seeing.
- Multiple books can be used, or just one book for a streamlined performance.

-
- When the book gets a bit destroyed from lots of performances, you can just print another - No more need to buy expensive replacement books!
 - The PDFs you receive can also be loaded on your smartphone, for a full book test routine on the fly!
