## Intricate Web of Distraction 2.0 by Pop Haydn - DVD

This is **Pop Haydn's** routine for the color-changing knives, completely redone for the 21st Century. This version plays big, and completely engages and captivates the audience and leads them on a fun ride that twists and turns and then brings them back to the starting point with a **WHAM!**

*"If I show you a knife, and close my hand and you hold my wrist and don't take your eye's off my hand, and I open my hand and that knife is gone - that wouldn't be sleight of hand would it? It would be REAL Magic!"*

*"No one can do that without creating what we call the intricate web of distraction... Want to see it in operation?"*

Thus starts a bewildering array of vanishes and transpositions that eventually end with knife actually disappearing under impossible conditions.

This is a magical and entertaining routine that does not require a lot of sleight of hand. The props are standard and easily available at almost any magic store. They pack small and play big, and are easily carried without a holder in the pants pocket. The routine can be done surrounded, and is instantly ready to go again.

This is a professional routine that always plays well and adds a little variety from cards to coins.

Every detail of handling and presentation is explained, and there is a live performance of the routine in the *W.C Fields Bar* at the **Magic Castle** in Hollywood, CA.
