
The Great Escape T-263 (2015) by Tenyo Magic Co.

Visually penetrate through metal!

Created by Ali Bongo

New Construction by Kenichi Komiay

The magician places a regulation die on top of a solid metal sheet, and covers the die with a cloth, to hold it in place. The die is unable to move in any direction. Upon the magician's command, the die visually penetrates through the metal sheet and falls into the glass below! Your audience can see the die through the cloth up until the last moment, as it slowly penetrates downward. The magical effect is stunning! This is a pocket-sized stage illusion that you can share with audiences, right in front of their eyes.
