
The Traveler by Jeff Copeland

The Traveler Coin Wallet is epitome of style, form and function, designed with the serious coin worker in mind. Originally crafted to hold and carry your prized coins & small wares, Jeff has ingeniously added a special feature to The Traveler that allows it to double as a utility gimmick that will allow you to also perform killer coin magic.

Each Traveler is meticulously selected from the finest, cured goat leather, and individually hand sewn by a seasoned, leather tanning artisan. Each Traveler will also include a secret URL that will deliver four original routines from Jeff's working library to use with your new Traveler Coin Wallet.

The Traveler is the world first coin wallet to infuse magic and aesthetic function into one unique coin wallet that will gain natural character over time.
