
Blackbird by Jeff Copeland

Jeff Copeland's Blackbird is the quickest, cleanest way to hold-out and produce coins at will. It is the magician's new, ultimate, spy tool that secretly places a coin directly in your palm, on demand. The user can calmly and reliably get extra coins into play with minimal effort and expert timing. At your pace, easily unlock, deploy, and deliver. Simply put, Blackbird delivers coins on demand. It's a sexy, undercover device that gives the user confidence and power to control the production of coins. Building on classic principles of magic, Blackbird reinvents the game on how coins come into play.

Blackbird is a bold new gimmick like nothing else on the market. It empowers you with confidence of years of practiced sleight of hand when coins simply appear without reaching into a pocket, making body steals, or moving hands out of the spectator's view. Easy to operate, Blackbird is at the command of the magician as seen in the demonstration trailer.

Blackbird provides freedom. No longer is there a rush to produce coins, because your coins are secretly and securely hidden until needed. Blackbird was designed to complement the natural movements in many coin routines, so the operation is quick & easy to learn. No ditches. No pockets. With Blackbird, there is no extra prop, clip, string or "sticky stuff" to ditch after production. Blackbird delivers the magician's coins without the need for unpractical performance angles or ever putting hands out of view. It is a true empowerment to classic magic.

Resetting a coin takes 5 seconds. Because of the unique front loading feature, the magician never needs to roll up the sleeve making it ideal for reset between tables in a strolling environment.

Each purchase comes with two sleek, ergonomic Blackbird units (for right and left arm), with armbands (adaptable to almost all body types), and adaptor inserts for smaller coins. Blackbird is designed to specifically be used with coins that are US Dollar and US Half Dollar sized, however will accept the most common coin denominations from around the world. The online instruction video teaches several hacks to experiment with coins that are slightly different sizes and thicknesses.

Over 3+ hours of detailed, online video instruction by Jeff Copeland teaching 6 fantastic routines to get you started. Also comes with a printable PDF

troubleshooting guide as well as teaching on all the handling, care, maintenance and ideas how to perfect your current coin routines.

The Blackbird is the quickest, stealthiest way to produce a coin, EVER.

"Where has this been all my life? Coin magic can shatter the glass ceiling with a utility device like BlackBird!"

- Eric Jones

"I'm giddy over these! Blackbird opens doors to techniques and methods in an area that's pretty limited."

- Brandon Wolf

"Quality, efficiency, confidence. I will use this to secretly organize my props in and outside of my performances. Thank you!"

Garrett Thomas

"You have changed the game. You have taken the fear out of sleeving."

- Justin Miller creator of Silver Dream
