
Flash Wand by Alan Wong

Produce a spark when you wave your magic wand!

This is all self-contained in a plastic magic wand installed with a super bright white LED light, with press switch operation and powered by a built in rechargeable lithium ion battery to produce that powerful flash.

Looks magical, fun to play with and kids will believe you have real magic power.

*NOTE: This product's charger is a **STANDARD USA 110 plug** and for all overseas vendors you will need to check your local regulations.*
