## **Kennard Box Mystery by Mr. Magic**

This is a classic close-up item you would love to use in your show!

A brass ring is placed on the floor of a small wooden box. The front and back doors of the box are closed. A mini magic wand is placed in the slotted holes existing on the side walls of the box with the ends of the wand protruding outside the box. The performer makes magical passes around the box, then takes out the wand and there comes the surprise. The ring is found to be trapped on the wand! Both doors of the box are open thus showing clearly that there isn't a duplicate ring.

The ring, box, magic wand can all be checked by the close-up viewers.

The box measures 5cm x 4.5cm x 7cm approx.
