## **reKap (DVD & Gimmicks) by Richard Griffin**

You show a small bottle of drink which can be examined. You unscrew the cap from the bottle and take a sip. You then push the cap into the bottom of the bottle where it vanishes and reappears back on top of the bottle, actually screwed back on. Can be immediately handed out again for examination.

**Part of the gimmick is based on an idea by Johnny Thompson and Dr Carlo.**

- Use any small drinks bottle
- Bottle can be examined before and after the effect
- You are left totally clean at the end
- Five second reset
- Suitable for stage and close up

Instructional DVD shows you how to make the gimmick that is required to perform the effect. Part of the gimmick is supplied.
