
The Floating Match (2 per box) by Premium Magic

A match and playing card are shown. The match is placed on top of the card and with a wave of the hand the match begins to float above the card. Higher and higher the match will float! Next you take another card and place it between the match and the card to show there is absolutely nothing holding the match up - it is truly floating! Next you say the magic words and the match slowly floats back down onto the playing card.

Included in the packet are two specially gimmicked cards, one regular card, and instructions for a great close-up routine. This effect may soon become the most popular close-up trick ever!
