## Psychic Card Stand

The magician introduces a beautiful acrylic stand displaying five different playing cards. A prediction envelope is introduced and handed to a spectator to hold. The cards are turned around, and removed from the stand. The cards are then shuffled and replaced back on the stand with the backs towards the spectators. One at a time, the spectator eliminates the cards until only one card is left. The magician turns the stand revealing the remaining card. The spectator opens the envelope revealing the prediction card - it's a match!
