
Burning Connection 2.0 by Andy Amyx

Have you ever wanted to produce a flaming business card from your wallet?

The Burning Connection 2.0 wallet will ignite your business card. When you extinguished the card it then can be handed to a spectator as your "Burning Connection".

This gimmicked wallet is absolutely one of the most impressive ways to present your business card. The wallet features a thin rechargeable battery and contains a completely silent gimmick. A safety on and off switch has been built into each wallet to prevent misfires. The updated 2.0 version features a design that has been changed to prevent possible melting of the business card housing.

- New reinforced safety switch
- New wallet design hand crafted
- New improved card housing

This wallet cannot be sold to anyone under the age of 18.

Includes a USB battery recharger for the wallet!
