
Way Out by Marc Oberon - Buch

Marc Oberon's Way Out is a versatile utility item that enables a single, folded piece of plain paper to contain the outs for anything up to twelve different predictions. It can be instantly opened to reveal only the desired one, with no fumbling or suspicious handling.

Experienced mentalist will readily appreciate its potential, especially when it is so easy to use and workable under most stand-up conditions.

Some twelve different effects are explained, but the real purpose in describing them is to illustrate a few possibilities, with the aim of inspiring you to come up with your own ideas.

"Brilliant! Brilliant! Our fraternity should be thankful to Marc for first, inventing this devious device and second, for teaching us how to do miracles with it."

-Barrie Richardson
