
White Bikes (2013) by Paul Richards

What seems like a simple prediction turns into something more - much more. Three magical moments occur, each getting progressively more impossible. Cleverly constructed to lead the audience down the garden path; then hit them squarely between the eyes with a shovel! WHITE BIKES is a very easy effect to perform and always leaves the audience astonished. It uses no rough and smooth, no knuckle busting moves, no deck switch, and it can be a different selection each time you perform!

The enclosed instructional DVD also includes a fantastic "no count" bonus handling as well as additional ideas and insights to get the most out of this incredible routine.

Comes complete with Bicycle gaffed deck and detailed instructional DVD.
