
Profile Skewer (DVD and Gimmick) by Garrett Thomas and Kozmomagic - DVD

As the art of magic evolves, we find that a single amazing moment is often stronger than an entire entertaining act. Coin magic, focused almost entirely on transpositions, is in particular need of something to make it "stand out" and give it more "depth."

With PROFILE and SKEWER world-renowned sleight of hand expert, Garrett Thomas, brings you two amazing moments of strange that will give your audiences something very different to talk about.

These extremely powerful, reality-twisting moments break through the expectations of the typical coin trick and force your audiences to ask themselves, "Did that REALLY just happen?"

PROFILE In Garrett's new coin concept, you slowly press your finger into a Kennedy half-dollar that amazingly melts, shaping a deep impression into the metal of the coin. PROFILE includes an optional twist ending, as the portrait of the president can be shown to have been pushed out in 3D.

SKEWER Garrett has reworked the classic Karate Coin into an illusion that allows you to slowly push your finger completely through a half-dollar and make it look as though it is melting in every direction through the face of the coin. This is definitely NOT your Grandmother's finger through coin trick!

Included with PROFILE and SKEWER are two amazing new tools, made from Kennedy half-dollars. Garrett explains how to use these tools in two real-world routines and includes four options for performing each of the effects (ranging in difficulty from novice to expert).
