
Canned Card (Blue) (Set of 10 cans) by Bazar de Magia

An effect that will be remembered by your audience.

A spectator selects a card, tears it in pieces and keeps one of them for himself. The magician burns/vanishes the remaining pieces and shows a perfectly well closed can. The can and a can opener are given to a second spectator. This spectator opens the can only to find a card inside, which has one corner missing. This corner is exactly the one that the other spectator kept for himself! Both can and card can be given as a souvenir.

Remember: The can is really closed and can be in full view the whole time. The spectator opens the can. The corner matches the chosen card.

This trick is a must-have that requires no sleight of hand.

You get a pack of 10 cans specially prepared with Blue back Bicycle cards

Can Dimensions *Approximately*: 2.5" tall - 2.75" diameter
