
Aleph Wallet by Vernet Magic

Aleph Wallet is the perfect tool for the working professional magician
Aleph Wallet is a multipurpose wallet that will allow you to perform plenty of Stage, Parlor and Close-Up audience tested miracles.
You will have an arsenal just in your rear trouser pocket

Aleph Wallet is more than a wallet:

Magnetic Add a Number Wallet

Always ready "Card in Wallet" (in spectator's pocket).

Switch Wallet

Index Wallet for billets

Secret Writing Wallet

Peek Wallet (two peeks internal and external)

... and much more

Comes with online video instructions (approx. 2 hours), with performances, full descriptions and more than **15 gimmicks and accessories**. You'll learn **14 professional routines** and many ideas and all the tiny details about the wallet.

Some routines explained step by step in the video

Money in your pocket (Marc Paul)

A great routine to perform at any venue. The magician can accurately guess, via "body language", in which pocket has the different bills he has secretly hidden. That's not all, as a great punch climax you show a prediction that was all time in full view.

Smart Room Service

Ultra practical and updated version of the classic "Room Service", useful in Close-Up, Parlor or Stage.

Psychic Birthday

You'll get into the mind of a spectator and reveal not only the month but also the exact day and the weather of a birthday he has in mind.

"Hands Off" Dictionary Test

A true "hand off" book test. The magician never touches the regular huge dictionary; he never asks the number of the freely chosen page but he can

accurately read the word the spectator has in mind.

Sweet Ring Michel reveals for the first time this closely guarded routine from his professional repertoire. This is a devastating routine: a spectator's finger ring magically travels to a selected and sealed sugar bag.
