

Keynote Speaking for Magicians by Paul Romhany - Buch

Romhany shares everything in this book including how to get in to the market, how to get booked on cruise ships as a speaker, selling products, how to write speeches, how to make money from this, putting together an entire package, incorporating magic in to your presentations, PLUS it includes Romhany's own presentation that he has made his living from both on land and at sea. As a bonus he has also included all of his research notes to do with his own topic "Laugh Yourself Well".

As any magician/speaker will tell you, the biggest benefit of doing this is not only the difference in fee you can charge but the contacts and networking that come out of giving a key note address. This is where 99% of corporate work comes from - as well as back of room sales. It's all in this 250 page book.

Those who purchased and are using Romhany's speaking package have this to say:
