

Ash Pen Pro by Magic Dream

Effect

Upon meeting a spectator, the performer asks the spectator to write their name on a file card. The file card is burned with a lighter and allowed to burn to ashes in an ashtray. The performer gathers a handful of these ashes and rubs them into his forearm. As the ashes spread over the performer's arm, the name of the spectator is revealed!!!

Ash Pen for a New Generation!

This special pen will allow you to perform the "ashes on arm" effect not only with great ease, but almost impromptu. In addition, it will open the doors to a wider range of presentational approaches.

This method is more simple and practical than any other method previously devised. The special pen will produce sharper and clearer messages on your arm or the back of your hand. In addition, you will now be able to make a message appear on a spectator's arm, without the aid of a stooge.

Ash Pen Pro Features:

- The message can be any size. You can draw the suit and value of a playing card, a figure, a first name, a geometrical shape, a picture, etc.
- The preparation will remain invisible at all times.
- Preparation only takes a few seconds. In certain situations, you can even prepare your arm **during** the effect itself, as soon as you acquire the information.
- You can write your message on a large variety of surfaces such as, but not limited to: skin, paper, playing cards, and restaurant menus. You are only limited by your imagination!!!
