

## What's Mine is Mine by Paul Richards - Trick

WHAT'S MINE IS MINE fools that pants off of magicians and laymen alike! It's a fun, ultra easy, quickie that you can carry with you all the time! Not to mention it's a steal at this low price!

You display a small packet of cards and ask that someone touch the back of any card they would like, it is a free selection and they may change their mind as often as they choose.

The selected card is removed from the packet and placed on the table. You then explain, "I'm glad you took that card because these are all MINE!" With that the cards in your hands are all turned to reveal the word MINE in big, bold letters! "But the card you took is YOURS!" The spectator's selection is turned over to reveal the word YOURS printed on it in bright red letters! You can also add the YOUR card back to the packet and instantly repeat the effect....thus proving that what's mine is mine and what's yours is yours!

This is a knock out effect that requires no special counts or sleight of hand. There is only one YOURS card in the packet; all of the others truly say MINE. It uses absolutely NO rough & smooth! There is NO force and the effect can instantly be repeated! Comes with special silk screened cards, wallet, and full instructions.
