

Wrong Way by Vernet - Trick

The magician shows a large traffic signal (12.5") that has a big arrow in each side. He explains that this signal is very important because the traffic must go in that way. One arrow is shown to be pointing to the left and the other to the right. The magician explains "this signal means that the traffic must go to the right and this other to the left". The comedy begins when the arrows begins to change and points the opposite way, both to the right, then both to the left, then up and down. Finally the magician says "... and if you don't pay attention to the traffic signals the police officer will give you a ticket" and at that moment the plaque drops open showing a police officer 38" high in full color, the face is cut out and the magician's own face shows through it.

Wrong Way is great for comedy and has a wonderful climax. This is a must for any magician working magic for youngsters. You get a special heavy board beautifully silk screened.

- PLAYS BIG AND PACKS SMALL
- PERFECT FOR THE M.C.
- SUITABLE FOR STAGE OR CLOSE UP
