

## Impossibilia Bannon, DVD

John Bannon is one of the most popular creators of close-up magic and his routines are regularly used by most professional and hobbyist magicians. If you don't have a John Bannon routine in your repertoire you are missing out on direct, visual and impossible close-up magic.

On this DVD John Bannon teaches the best routines from his best selling book *Impossibilia: The Magic Of John Bannon*. The routines taught on this program are currently being used by many of the leading close-up magicians. These are the routines that gave John a worldwide reputation. You will immediately add many of them to your working repertoire.

Routines performed and explained:

- **Shriek Of The Mutilated:** A visual flash restoration of a torn piece of cigarette paper. Play it Straight (Triumph): Bannon's outstanding no-sleight triumph routine where all the cards of the selected card's suit remain face up after three fair shuffles.
- **Vacuum Packed:** A quarter magically penetrates a small sealed glass bottle and is visually removed through its tiny opening.
- **Directed Verdict:** A spectator cuts the deck into four packets. The spectator turns the top card of each and shows them to be aces.
- **Revolutionary Penetration:** A Chinese coin is threaded and tied on a shoelace. The lace and coin are placed into a spectator's fist and impossibly separate.
- **Return of the Magnificent Seven:** Seven duplicate cards are shown and a card is selected. Each and every one of the duplicates now changes into the selected card. Everything is examinable.

**Plus performances and explanations to:** Strangers'

Gallery, One is the Onliest, Shock Treatment, Heart of the City, The Birnman Revelation, Shanghai Surprise, and Photologic. Also explained are the many techniques used to accomplish these miracles.
