

Legend (DVD and Gimmicks) by Justin Miller and Kozmomagic - DVD

FREE Jacked and Open Prediction downloads with purchase

In an attempt to be charitable you explain that one of your audience members has a REAL chance to win some money, let's say \$100 (it can be any denomination of any country). You place a card face down into the empty card-box with the folded, desired currency and you hand the box and money to them (or just lay it on the table). You ask them to name any card, no force, anyone at all. let's say they say "10 of diamonds" , with a sly grin on your face you slowly take back the card-box, open it up, take out JUST the money and ONE card (there are no extra cards, the box is empty, they can crawl inside for themselves) and when the card is turned over it is found to be the freely named card, and you get to keep your money and become a LEGEND in their re-telling of the story they just witnessed first hand!
