

Four Square Blendo

Effect

This is one of the most beautiful and classic effects of magic! ****Very Easy To Do!****

The magician shows the audience five silks. One is red, one is yellow, one is green, one is blue and one is white. The white silk is tied around the others. This white silk is untied, and set aside. The other four silks are then held between the magician's hands. He twirls his hands for a moment. Suddenly, instead of four individual silks, he only has one big 36" square silk scarf in his hands! It is composed of four colors: red, yellow, green, and blue. ****The four scarves have "blended" into one!****
