### **Excerpt from the Introduction:**

Where do you start one of these things? I've never had to write anything like this before. There was that one job application and that police report. Well, nevermind. Why does this book exist? Basically, it's because I haven't seen this kind of book on illusions in any magic shop; a book with just original ideas or illusionist. I have a few books on the subject of large stage illusions and Jarret, by Jim Steinmeyer has to be my favorite. I thought it would be cool to have a sort of modern "Jarrett" type book containing new and modern material. And for the record: I'm not comparing myself to genius that was Guy Jarrett or the genius that is Jim Steinmeyer. I do thing Guy Jarrett might have gotten a kick out of this book and probably even swore a bit.
