

Magic from the Overground by Paul Hallas - Book

Paul Hallas, the best-selling author of *Small But Deadly* and the *Mindful Mentalism* series is back with his best book yet. His new book is a compilation of his favorite effects from the past 25 years. Some have appeared in print in limited edition booklets and magazines (some obscure), some are previously unpublished and others were released as marketed effects. Of those that have appeared before, some have evolved over the years and additional thoughts are included. You'll find a combination both close-up and mentalism routines, with over 50 routines in all. The close-up magic focuses primarily on cards with a few coin tricks thrown in. Includes an enlightening essay on strolling magic along with a comprehensive list of the best effects to use for strolling magic.

Pages 227 - Hardbound with Dust Jacket
