

## **K.O. Rope trick Ling Fu and Henry Evans**

In this truly incredible rope routine, the performer starts with a single rope. He/she then proceeds to cut the one rope in two. Now with two ropes, the performer magically mends the ropes together. After he/she has done so, the magician then without cutting, makes four separate ropes! The magician can mend the ropes into one rope once more and then separate them one last time. All four ropes are examinable!!

**Includes a video performance of the effect!**
