

McAbee Rings (Gold Rings and DVD) by Martin Lewis - Trick

"...The DVD instruction is very good. Martin Lewis has made quite a production of this little trick. In his explanation, Martin uses rings of different colors, a great aid to understand what is going on. ...'The McAbee Rings' is a real fooler. I'm glad it's available again"

-Mike Close

In this classic, most elegant close up linking ring routine, three gleaming bracelets, are linked and unlinked according to your will, even whole being held by a spectator! At the end of the routine the rings are handed out for minute examination.

Many hours of thought and preparation have gone into the routine plus hundreds of actual performances to test its solidity. The serious student of magic will, at once, appreciate the built-in psychology and misdirection incorporated in the routine.

For the strolling performer Martin shows, in a detailed step-by-step instruction, how to make Per Helmark's exceptional switching device.

Running Time Approximately 1hr 24min
