

NFW trick

Effect

If you have to ask what the name stands for, you haven't seen it done! Effect: You display a packet of four face up Jokers. As you count through them, one Joker turns face down. As you count through again, another turns face down. The effect is repeated with the next two cards, until all four are clearly seen face down. But...when the cards are turned over, they have somehow become the four Aces! NFW is a devastating and revolutionary twist on twisting, it just doesn't get any cleaner than this! Comes complete with the necessary cards and instruction link.
