

NEW Chinese Miser Dream 2-side Jum

Great new style! This set can be shown on both sides! yes that's right you can show both sides of the coins as you make them appear! Get them before they disappear.

Part 1: The magician shows two chinese coins (regular size) and says that in China "less is more". He puts one of the coins in his pocket, clearly leaving only one coin in his hand; but when he asks how many coins are left and spectators answer "one", he opens it and there are three coins! He repeats the action, putting one of the three coins in the pocket, leaving two in his hands but when spectators say "two" he can show there are now four coins! Very visual effect. In the end the four coins can be examined.

Part 2: The magician shows two jokers, both sides, and his hands completely empty. The two cards are put together face to face and a jumbo chinese coin appears from in between them. This is repeated three times causing three more jumbo coins to appear from nowhere, always showing the cards both sides and the hands empty. All four coins can be shown both sides. The clear conditions in which this effect takes place makes it a miracle.
