Now Back in PRINT!

The FIRST and ORIGINAL English books to contain material on magic costume changes ever published in the WORLD were written in 1911/1912 by Will Goldston. In 1911 he published "The Magicians Annual" and in 1912 in "Exclusive Magical Secrets" in which 5 different Quick Change methods based on one tear away seam: The hook and eye fastener. In the last century Quick Changes have been described in more than 10 English books and pamphlets. The German book "Quick change" (published in 2003) was the most intensive publication to date and contained on 80 pages 5 different tried and tested methods of fastenings - methods for holding the materials closed, and ways to open them, the so-called "tear-away" seams. Well known Russian quick change artists termed one of the 5 methods of fastening as a "revolution". For example: If you use press studs and Velcro, you have two methods of fastening.

In the new English book "Quick Change" 15 different methods of fastening are described, the so-called "Top Secret High Tech" hard cores.

There are :

The hook and eye fastener

The standard press studs/poppers fastener

The double press stud/poppers fastener

The simplest pull fastener

The pull with eyelets fastener

The tunnel pull fastener

The double pull fastener

The fish bone pull fastener

changes. In theory there are several hundred combination possibilities for Quick Change methods.
