

Red Rover by Dan Harlan - Trick

A spectator merely thinks of any card seen in a small packet of ten cards. Instantly, the thought-of card vanishes, leaving only nine cards remaining! The vanished card re-appears in a packet held by another spectator! The magician never touches these cards, and doesn't even know what the selection was.

Comes complete with the necessary, specially-printed Bicycle cards and detailed, fully-illustrated 20-page instruction booklet.
