

Zig Zag by Mickael Chatelain - Trick

Effect

A spectator selects a card (for example, the Queen of Hearts). The performer requests that they sign the front and/or back. The card is placed on top of the deck still in the performer's hand. A 'magic card', with 2, quarter sized holes, is produced and placed on top of selected card. The performer makes a cutting motion with their fingers over the card. Then as the 'magic card' is slid away from the deck, you can see through the holes, that the selected card has indeed been cut in half! The 'magic card' is returned to its original position restoring the selected card, which the spectator can inspect and keep as a souvenir.

Comes complete with gimmick Bicycle card , red Bicycle card with 2 holes, and instruction sheet.
