CLOSE-UP FILE is a collection of magic which uses no playing cards. This larger collection of magic contains 35 complete routines in 195 pages and is profusely illustrated with line drawings.

CLOSE-UP FILE is a big hard bound book with 195 pages. The book contains many novel close-up effects. None use playing cards except as incidental props. Most are previously unpublished and are worked with simple props which the reader can make up, or is likely to have on hand already.

Profusely illustrated with line drawings throughout. Richard Bartram, Jr. did the illustrations and they really help the reader understand the magic material.

CLOSE-UP FILE emphasizes complete effects as opposed to moves and sleights. Where moves and sleights are described, they are used in the effects described. The magic ranges from simple, nearly self-working tricks through the gamut of tricks requiring standard skills, to advanced magic which requires skills which will be new to most readers.

Most of the tricks described can be performed with props most magicians already have on hand. Much of the book's content is previously unpublished. The close-up magician should find many tricks and ideas of immediate interest and use!

Magic By World Famous Performers and Creators included are;
