

Mike Powers' Diminishing Returns - Trick

Mike Powers' Diminishing Returns is one of the most amazing (and bestselling) close-up tricks ever released. And now it's back and better than ever with VIDEO instruction.

EFFECT: You display the fronts and backs of a deck of cards to the audience. A spectator simply names any card they like. You remove the named card and set it aside face-up. You now spread the deck on the table. Somehow all the cards have shrunk to mini size (half as big)! The selected card is still normal size. Then, just when the audience catches their breath, the entire deck grows back to normal size. But, amazingly, the selected card has now shrunk to mini-size! To finish, the selected (named) card visibly grows back to normal size.

Comes complete with a very special deck, printed by U.S. Playing Card Co. in Bicycle design. A **free BONUS** trick is included - *The amBIGuous Card*. Video instruction for both *Diminishing Returns* and *The amBIGuous Card* is provided for easy mastery.

The only skill needed to perform *Diminishing Returns* is the ability to spread the cards on the table. It's virtually sleight free. The deck does all the work for you.
