

Cellini Art Of Street Performing Vol. 2 - DVD

At last, the long awaited release of volume two in the "Cellini Presents" series, "The Art of Street Performing" has arrived. This volume deals exclusively with magic and magicians. You will find my complete routine performed live in front of audiences on the streets of New Orleans. We then take it to the studio for an in-depth look and breakdown of that very routine and the effects I use. You will also be shown how to create a stage on the open streets and in other public spaces. This video expands on and reinforces the building blocks you learned from the first volume, "The Art of Street Performing." It is my hope that, with this video, you will further your education and become a better performer, as well as a bonafide street magician.

Running Time Approximately 1hr 40min
