

The Psychomatic Deck (Red) by Kaymar

If you don't know what the **Psychomatic Deck** is, it's an amazing deck. You can spread it, show it, have a spectator shuffle it and then break it open to peek at a card. They can then shuffle again, and pop the deck straight into the box.

With the right audience management, you can even have the spectators do all that while across the stage, street or in another room!

Despite this, the card they see is the force card, and you can reveal it any way you want!

It also makes a perfect tossed out deck, but you can show it clearly, and the spectators can see all the cards are different! Includes custom made bicycle deck and video instructions, teaching handling, tips and full routines using the **Psychomatic Deck!**

Learn how to read minds, predict the future (and end clean!), the ultimate Tossed Out deck and some mental epic variations, all taught in full detail by Liam Montier, and filmed by Big Blind Media.
