

## Silent Focus - Pokerdeck

The card box is crafted with tactile and visually superior pearlescent paper, presenting a delicate texture alongside its smooth surface. The rich color settings are omitted, not for a colorful and straightforward revelation, but for an implicit and profound emotional change.

The black, white, and gray colors bring a quiet and silent atmosphere to the scene. Multiple non-repetitive character eye illustrations focus on the card backs, making each card in the deck a unique presence. Upon closer observation, not only are the card backs adorned with eyes, but various eye illustrations are also hidden in the suits on the card faces. The refined and minimized pip design further directs attention to the uniquely designed suits.

This silent masterpiece of profound artistry seems to transcend mere playing cards; it is a silent art, as well as an extraordinary treasure.

- Silent contemplation, a silent masterpiece
- Delicate pearlescent paper card box
- 54 non-repetitive card backs
