

Aero WHITE by Bond Lee and ZF Magic

Aero

- the world's lightest dancing cane, created by Bond Lee and ZF Magic.

The dancing cane is one of the best levitations ever invented in magic. Now you can perform this miracle everywhere without limitation. Although it's light, it's still well balanced and easy to manipulate.

Thread has always been the biggest limitation of the dancing cane; with Aero, you can levitate this dancing cane with real close-up invisible thread, so your performance limitation no longer exists.

Aero can split into two parts for easy portability. It also comes with a holder, providing an easy extraction of the cane.

Aero is the perfect dancing cane.
